

concat()

- glues data sets together
- a structure-focused operation

merge()

1	a
3	b
9	c

 +

v	7
r	4
a	9
b	1
c	2
k	3

 =

1	a	9
3	b	1
9	c	2

- combines data sets together based on the *content* they share
- much more flexible than `.concat()`!
